Citymapper Transport App

Looking for a smarter way to plan your journeys?
 The Citymapper Transport App could be just the thing. It shows the nearest transport options to your current location as well as real time tracking.
 The map lets you see exactly where buses and trains are on their routes, so you won't be caught out by delays or cancellations.
 A handy tool for making your daily commute much easier.

E-bike and E-scooter Battery Safety

The Open University recognises the risks linked to storing e-bikes and e-scooters. We will maintain our current safety measures to minimise hazards and protect staff, students, and the public.

- E-bike batteries must be stored and charged only in designated charging lockers, located away from buildings. Charging inside university buildings is strictly prohibited.
- E-scooters are banned from being used on site

Do you use the H9 Groveway for work or day to day travel?

The road bridge between Simpson and Walton will be closed for 10 weeks from 18th August for essential works.

The road will be fully closed to traffic and a diversion route will be clearly signed. Pedestrian and cyclist access will not be affected and the footpaths above and beneath the bridge will remain open.

Campus will still be accessible from V10 Brickhill Street.
